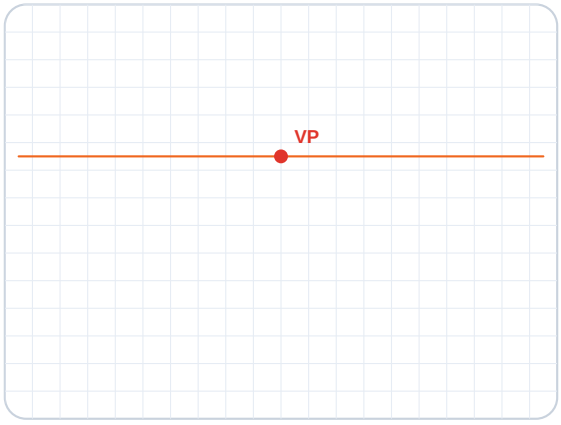
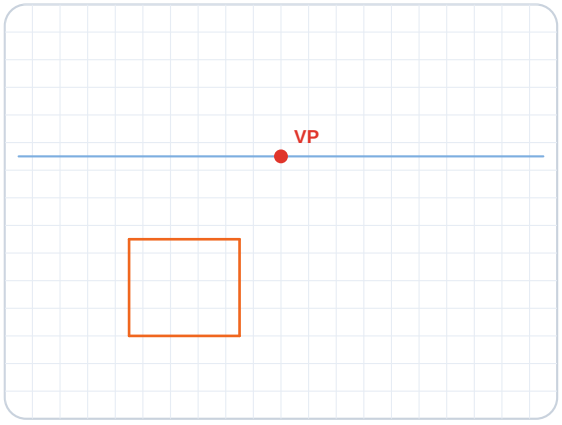
Box in one-point

Follow the steps. Orange = the line you draw in that step. Blue = light guide lines.



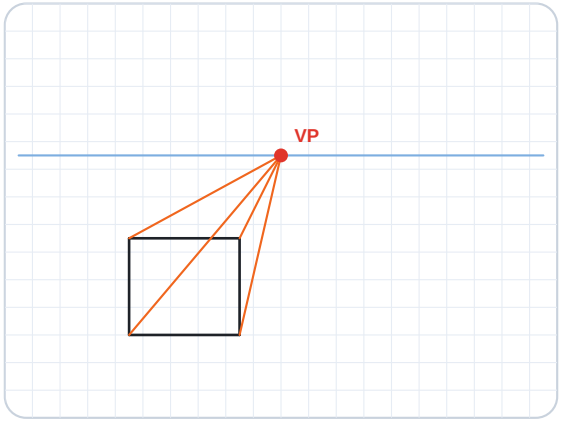
STEP 1 **Horizon and one VP**

Draw the horizon and put one vanishing point on it.



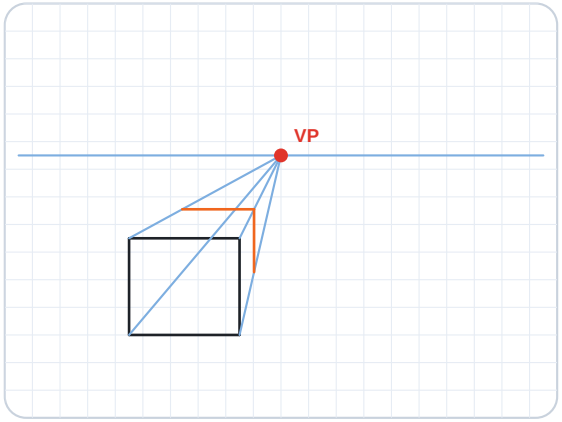
STEP 2 **Draw the front square**

Below and to the left of the VP, draw a square facing you. Its sides are perfectly vertical and horizontal.



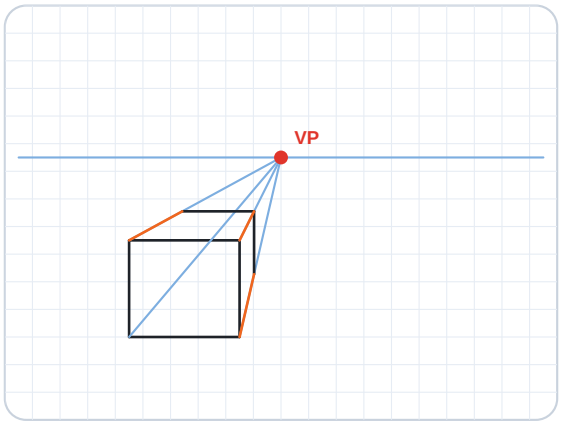
STEP 3 **Connect corners to the VP**

Draw a light line from each corner of the square to the vanishing point.



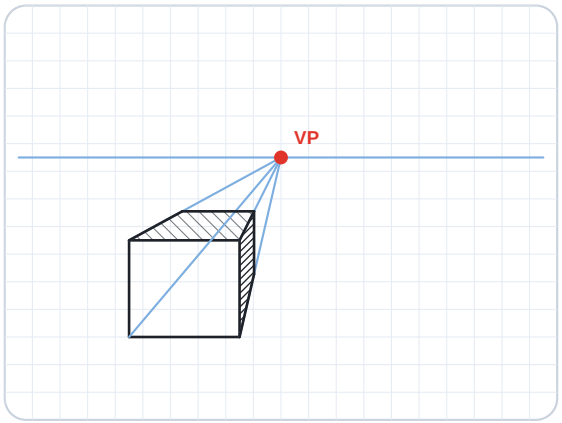
STEP 4 **Choose the depth**

Decide how deep the box is. Draw the back edges: one across for the top, one straight down for the side.



STEP 5 **Ink the visible edges**

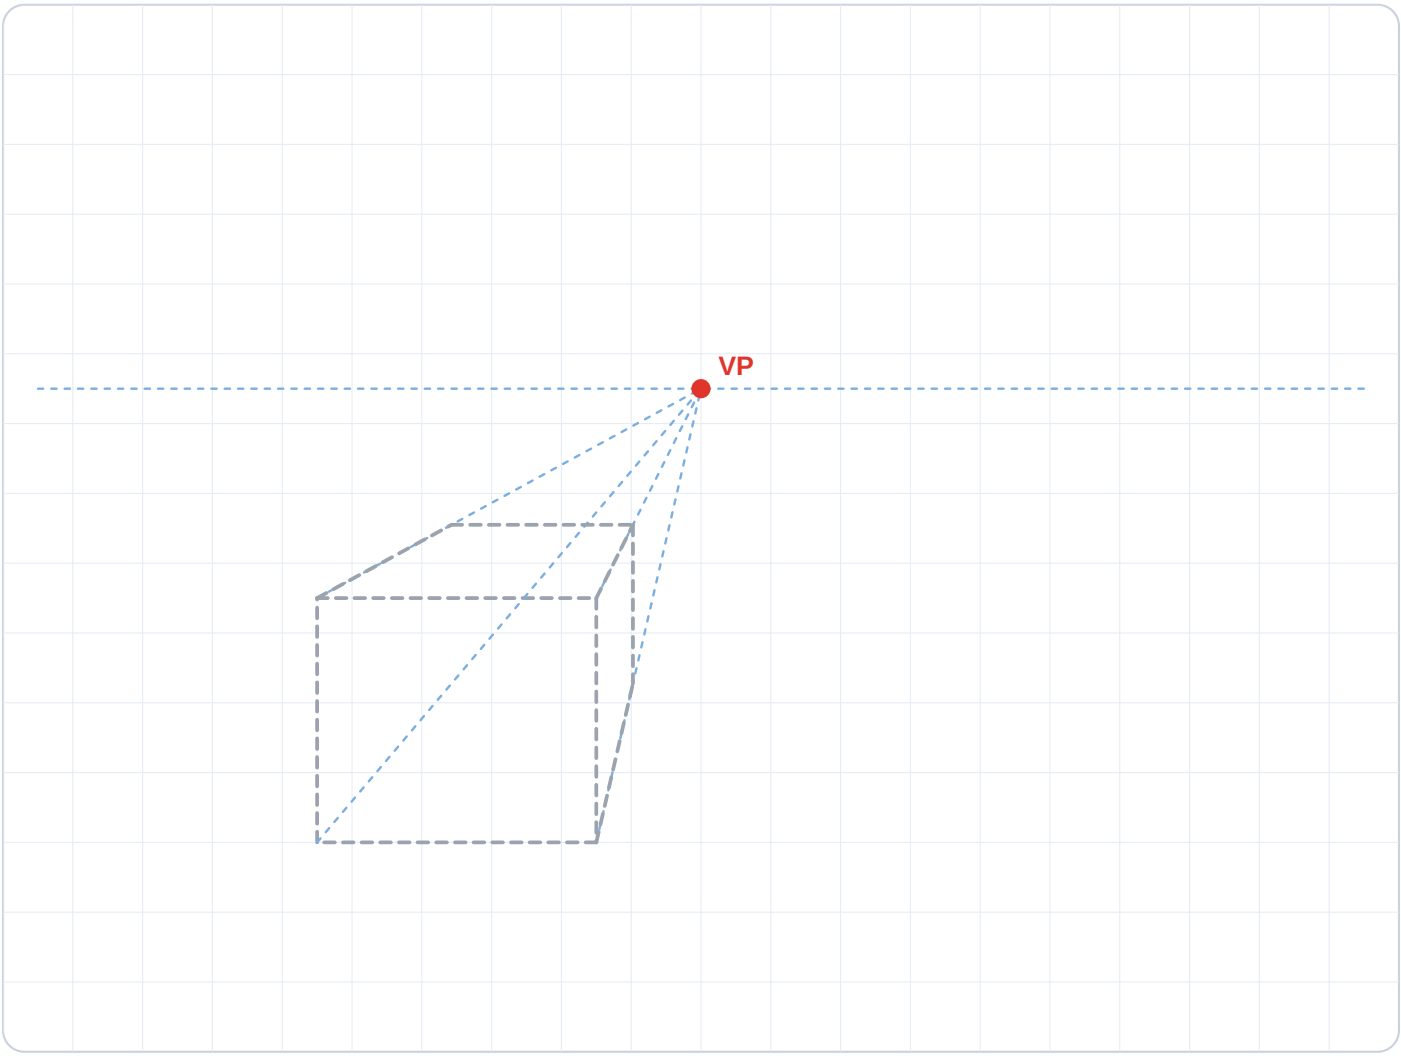
Ink the edges between the front and the back that you can see. Leave the hidden ones out.



STEP 6 **Shade it**

Shade the side away from the light, and give the top a light tone. That is a box in one-point perspective.

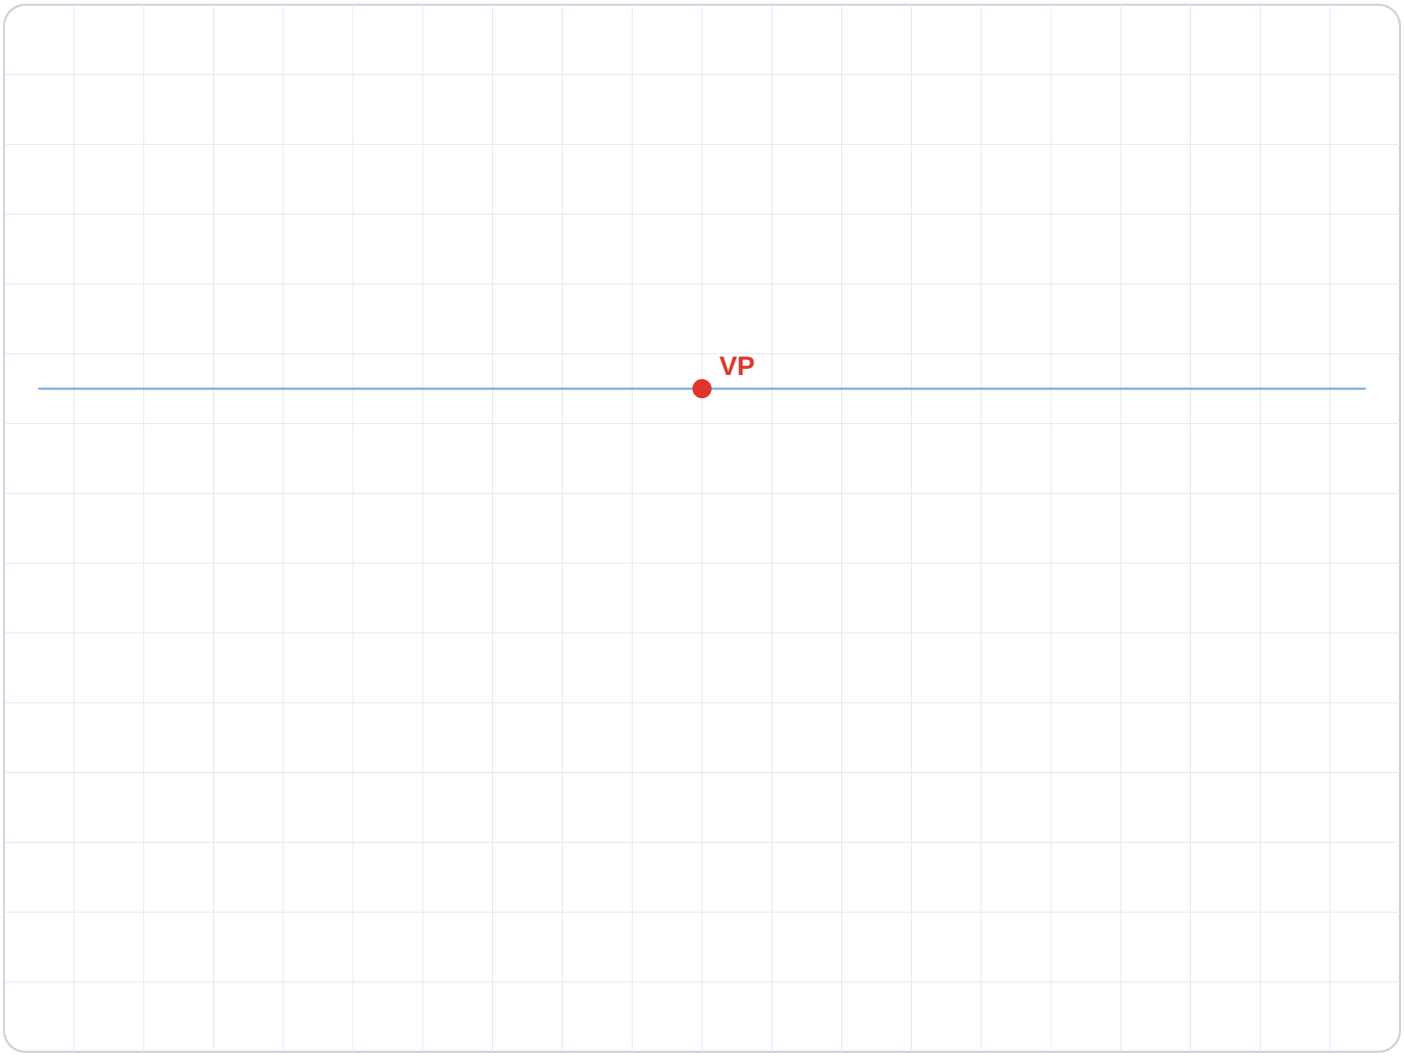
Box in one-point



How to use this page

1. Trace the blue dotted guide lines very lightly.
2. Go over the grey dashed lines firmly. Use a ruler.
3. Shade the dark side last. Then try it on the next page without help.

Box in one-point



Now draw it on your own

The horizon and vanishing point are already here. Build the drawing from step 2.
