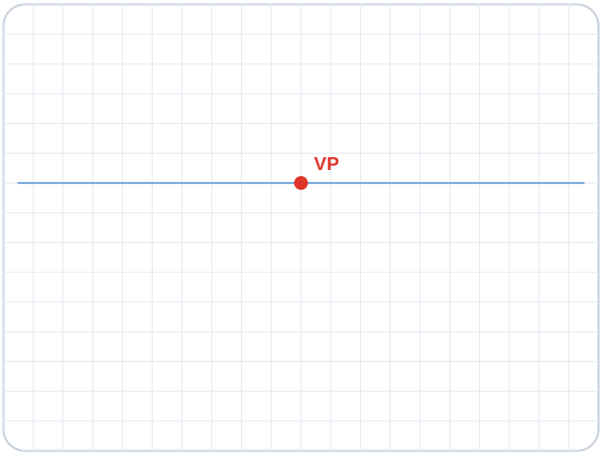
# Road to the horizon

Follow the steps. Orange = the line you draw in that step. Blue = light guide lines.

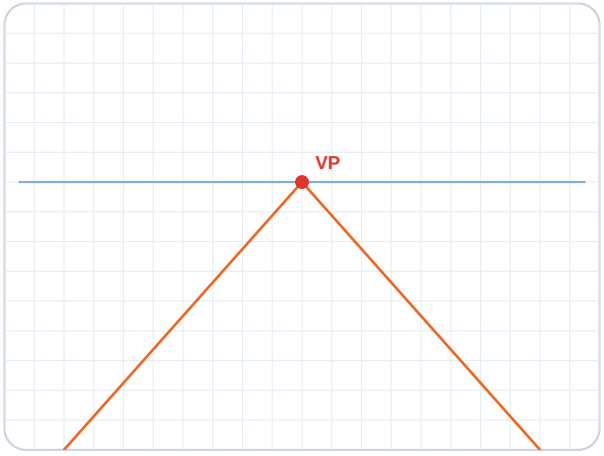
## STEP 1 Find your eye level

Draw a light horizontal line across the page. This is the horizon: the height of your eyes.



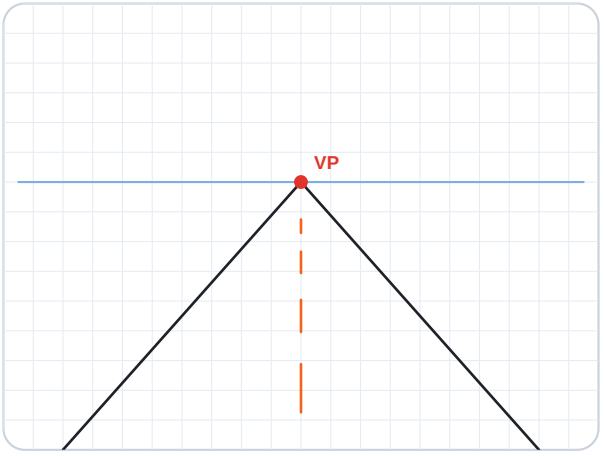
## STEP 2 Place the vanishing point

Put one dot in the middle of the horizon. Everything that goes away from you meets at this point.



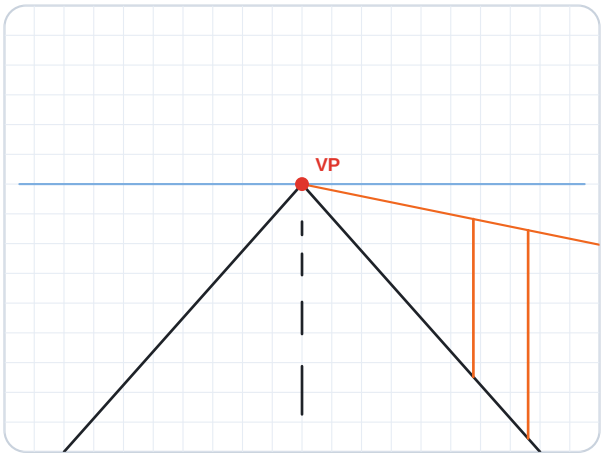
## STEP 3 Draw the road

From the dot, draw two lines down to the bottom corners of the page. That is a road running to the horizon.



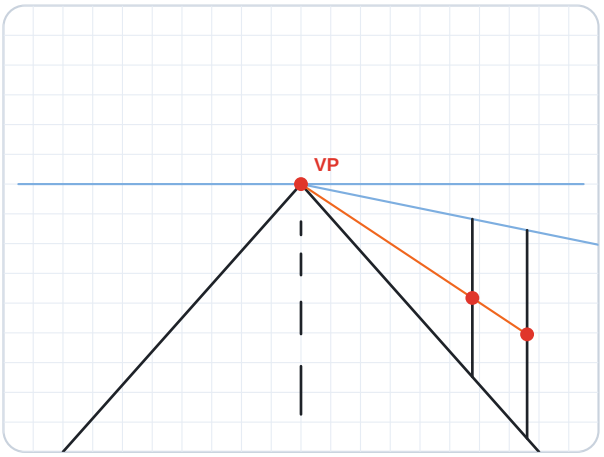
## STEP 4 Dash the centre line

Add the centre line as dashes. Each dash gets shorter as it gets closer to the vanishing point.



## STEP 5 The first two poles

Draw the closest pole on the road edge. Run a guide line from its top to the VP. Choose where the second pole stands: its top touches that guide line.

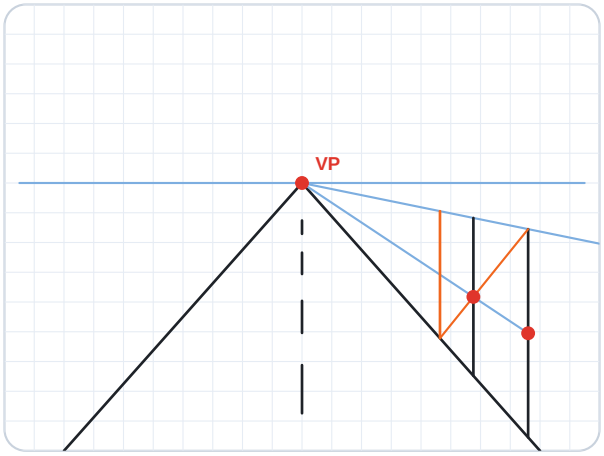


## STEP 6 Find the middle

Mark the middle of the first pole. Draw a guide line from that point to the VP. It cuts every pole exactly in half.

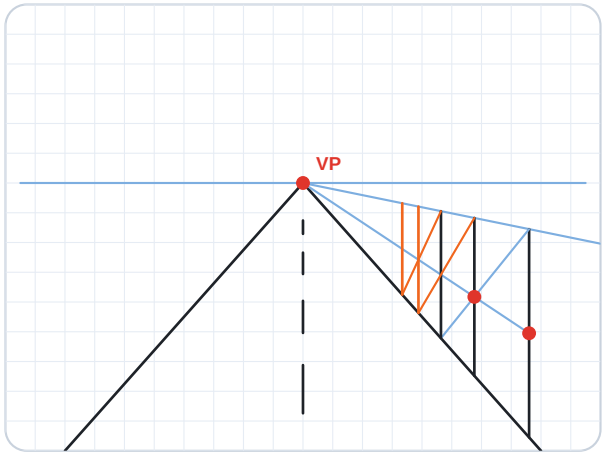
# Road to the horizon

Follow the steps. Orange = the line you draw in that step. Blue = light guide lines.



**STEP 7** **Measure the next pole**

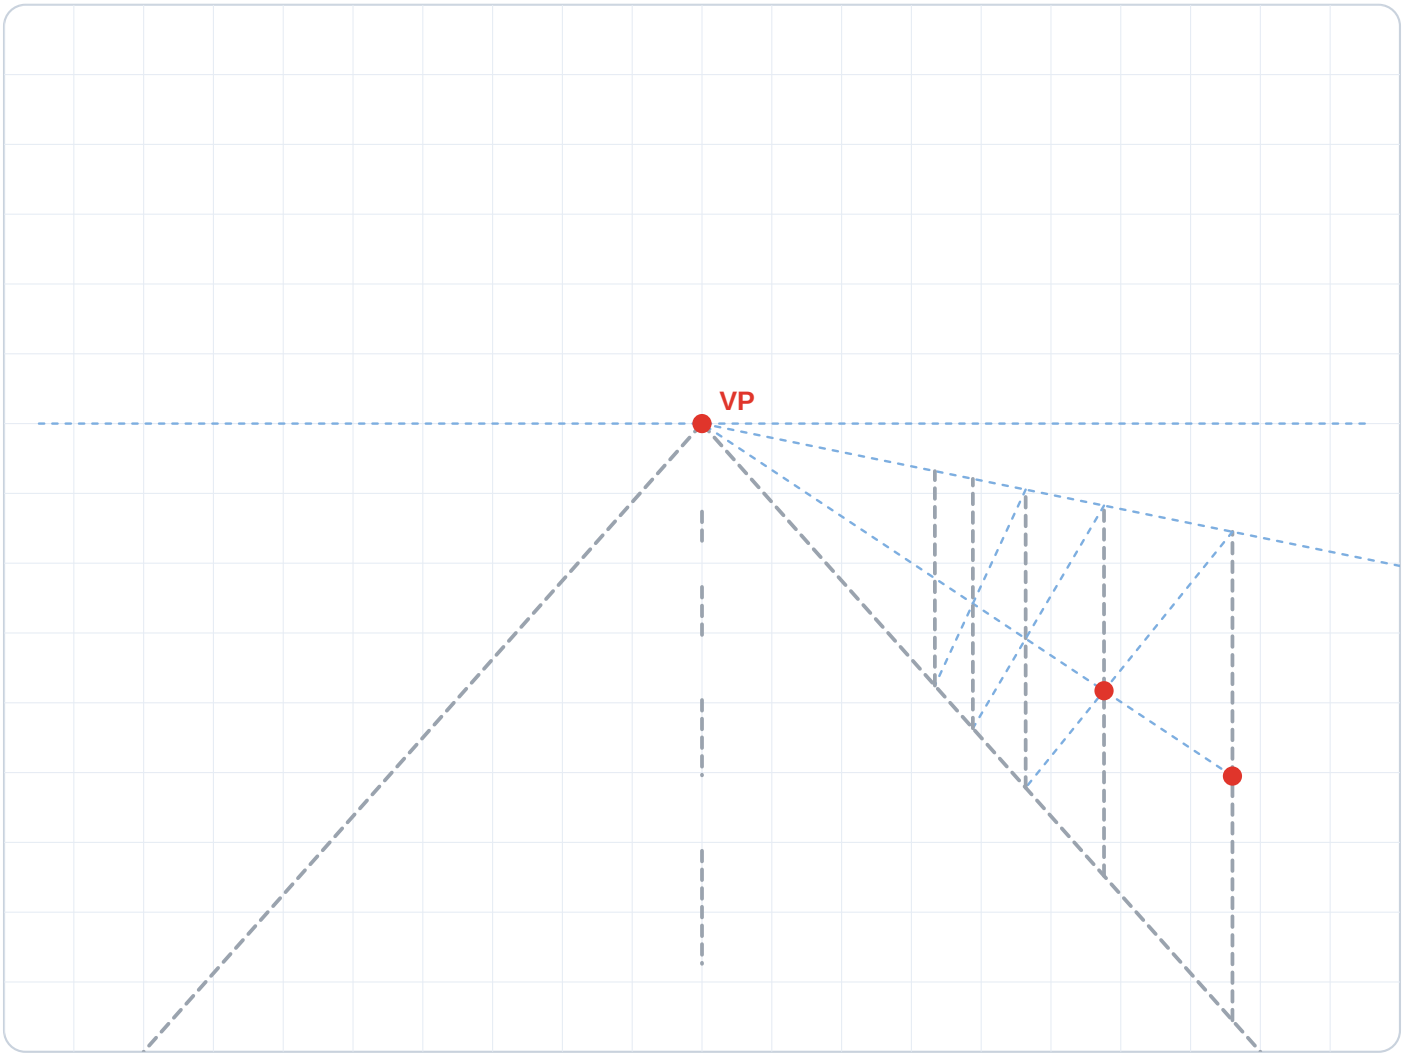
Draw a diagonal from the top of the first pole through the middle of the second pole, down to the road edge. That is where the third pole stands.



**STEP 8** **Repeat the measuring**

Do it again: from the top of pole two through the middle of pole three, then from pole three through pole four. The gaps shrink exactly as they should.

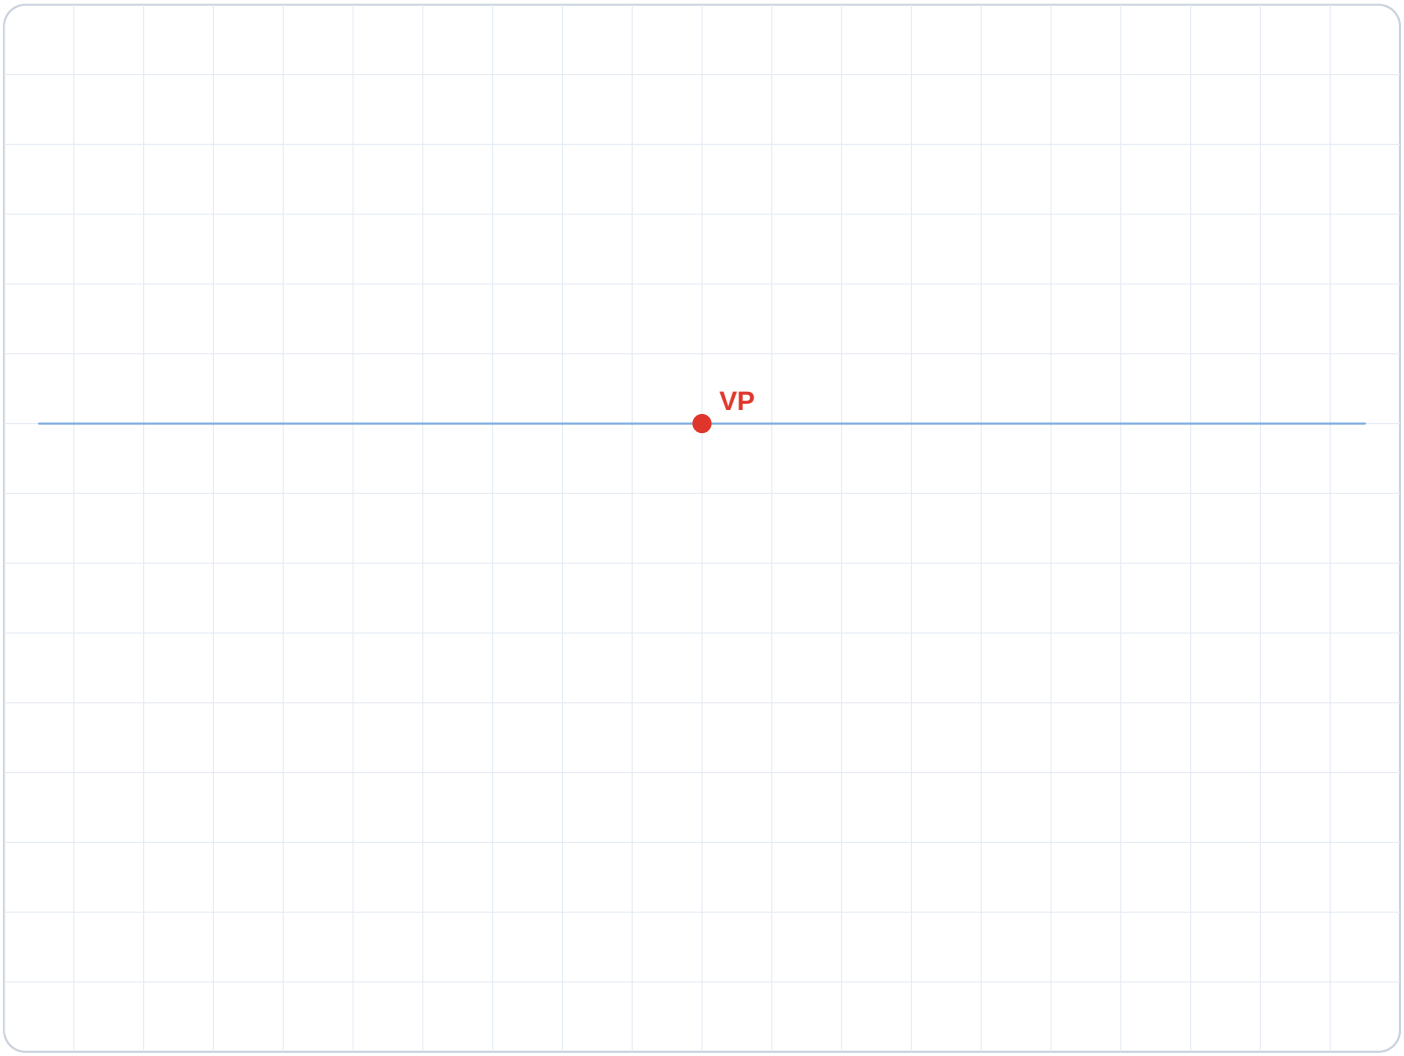
# Road to the horizon



## How to use this page

1. Trace the blue dotted guide lines very lightly.
2. Go over the grey dashed lines firmly. Use a ruler.
3. Shade the dark side last. Then try it on the next page without help.

# Road to the horizon



## Now draw it on your own

The horizon and vanishing point are already here. Build the drawing from step 3.
