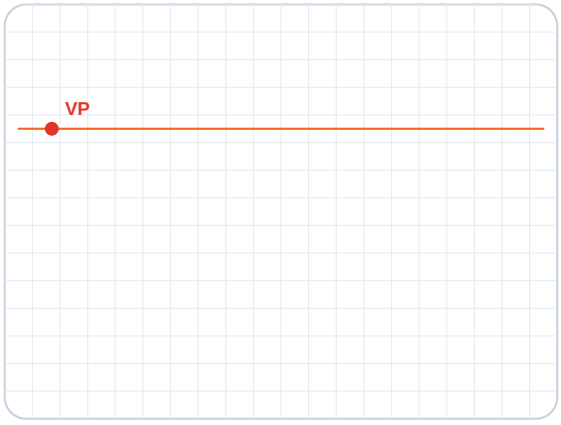
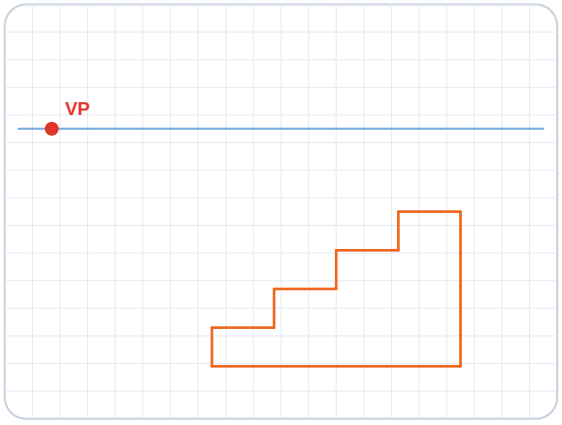
Stairs in one-point

Follow the steps. Orange = the line you draw in that step. Blue = light guide lines.



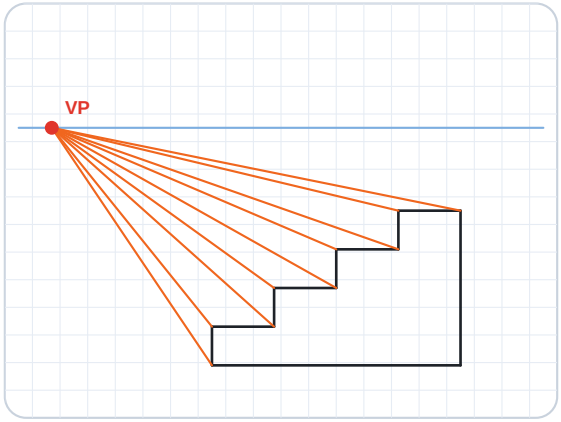
STEP 1 **Horizon and VP on the left**

Draw the horizon high on the page and put the VP near the left edge. We will look at the stairs from the left.



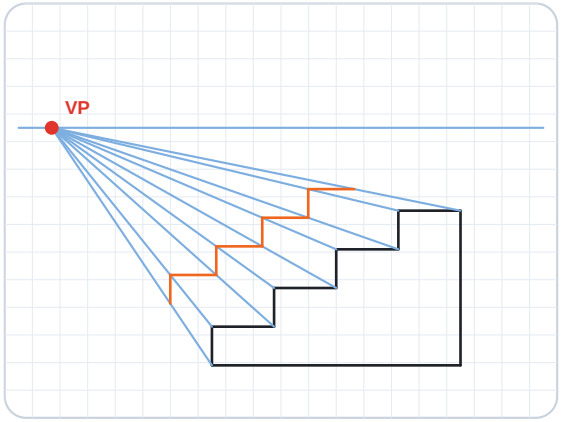
STEP 2 **Draw the side profile**

Draw the stairs as a flat zigzag: up, across, up, across. This is the side of the staircase facing you.



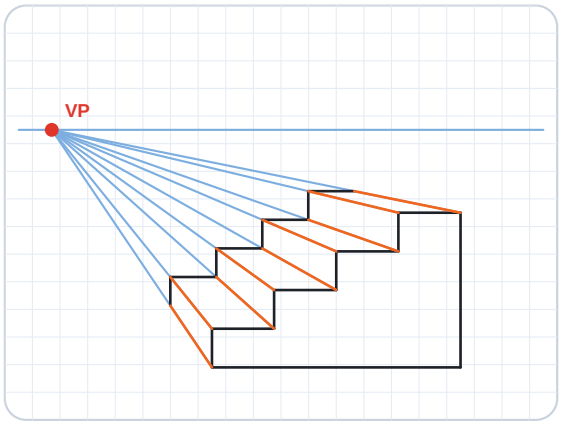
STEP 3 **Lines to the VP**

From every corner of the zigzag, except the bottom right one, draw a light line to the VP.



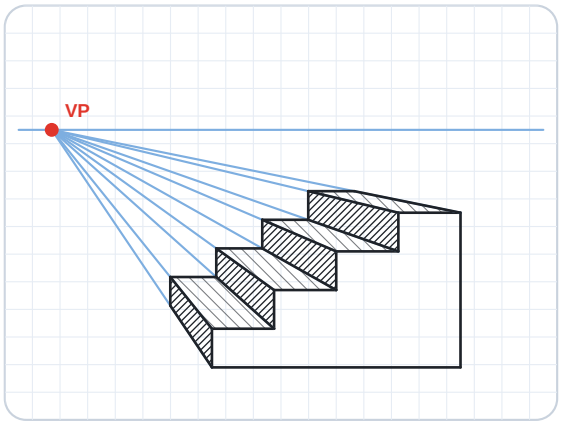
STEP 4 **Choose the width**

Decide how wide the stairs are. Copy the zigzag along the guide lines. Each back edge is parallel to its front edge.



STEP 5 **Connect the steps**

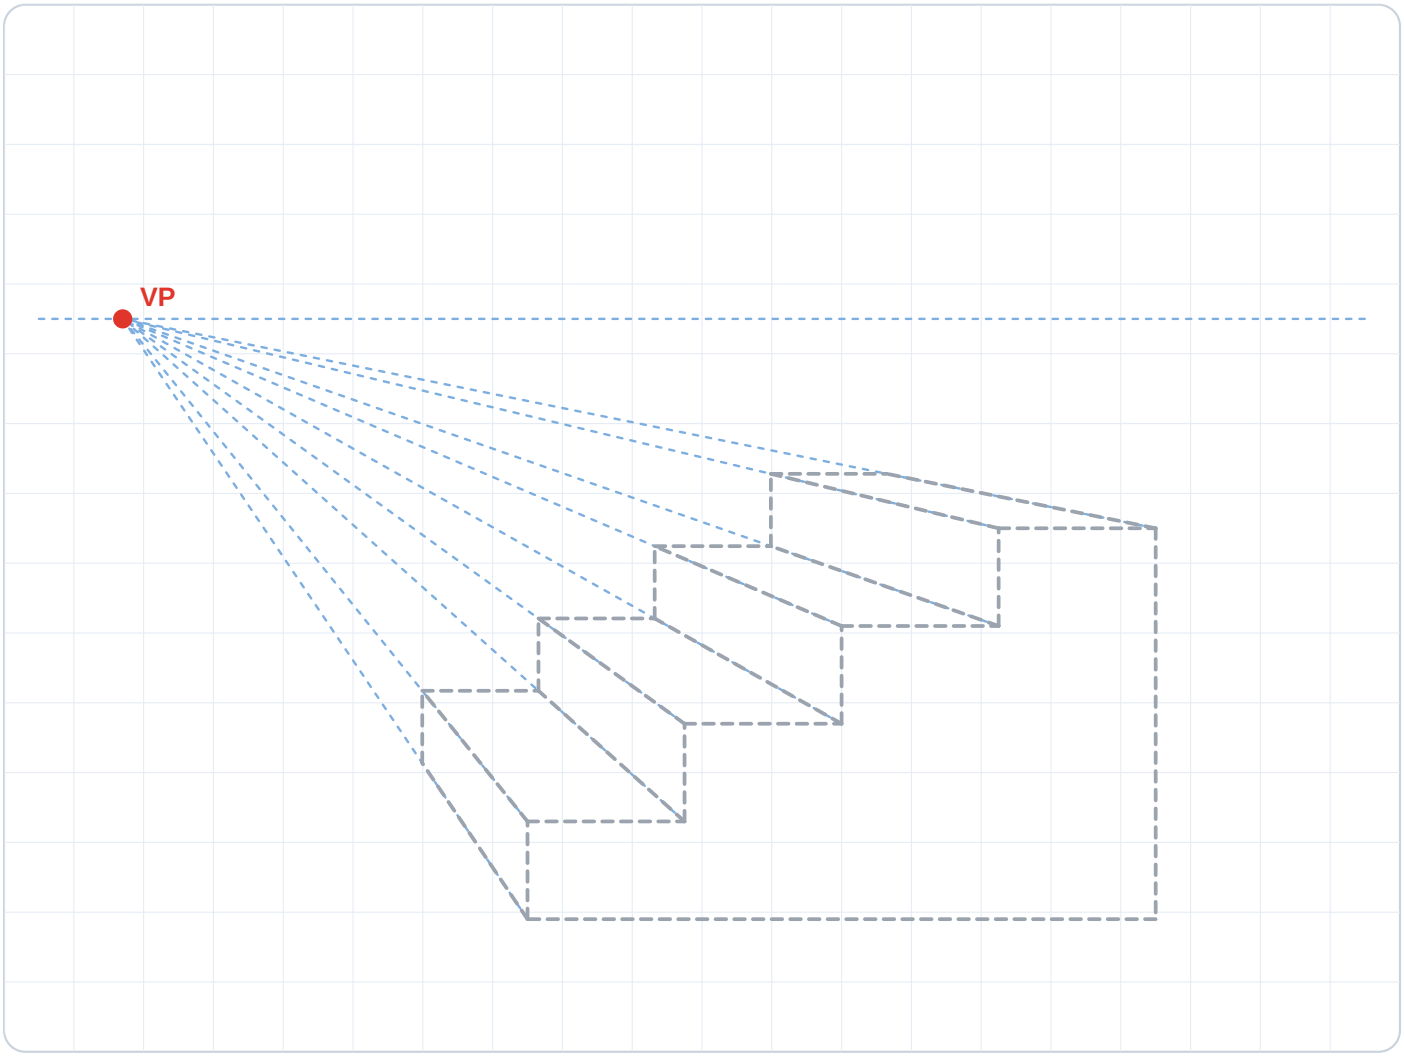
Join each front corner to its back corner. Now every step has a top and a front.



STEP 6 **Shade the risers**

Shade the upright faces of the steps and give the tops a light tone. Your staircase is done.

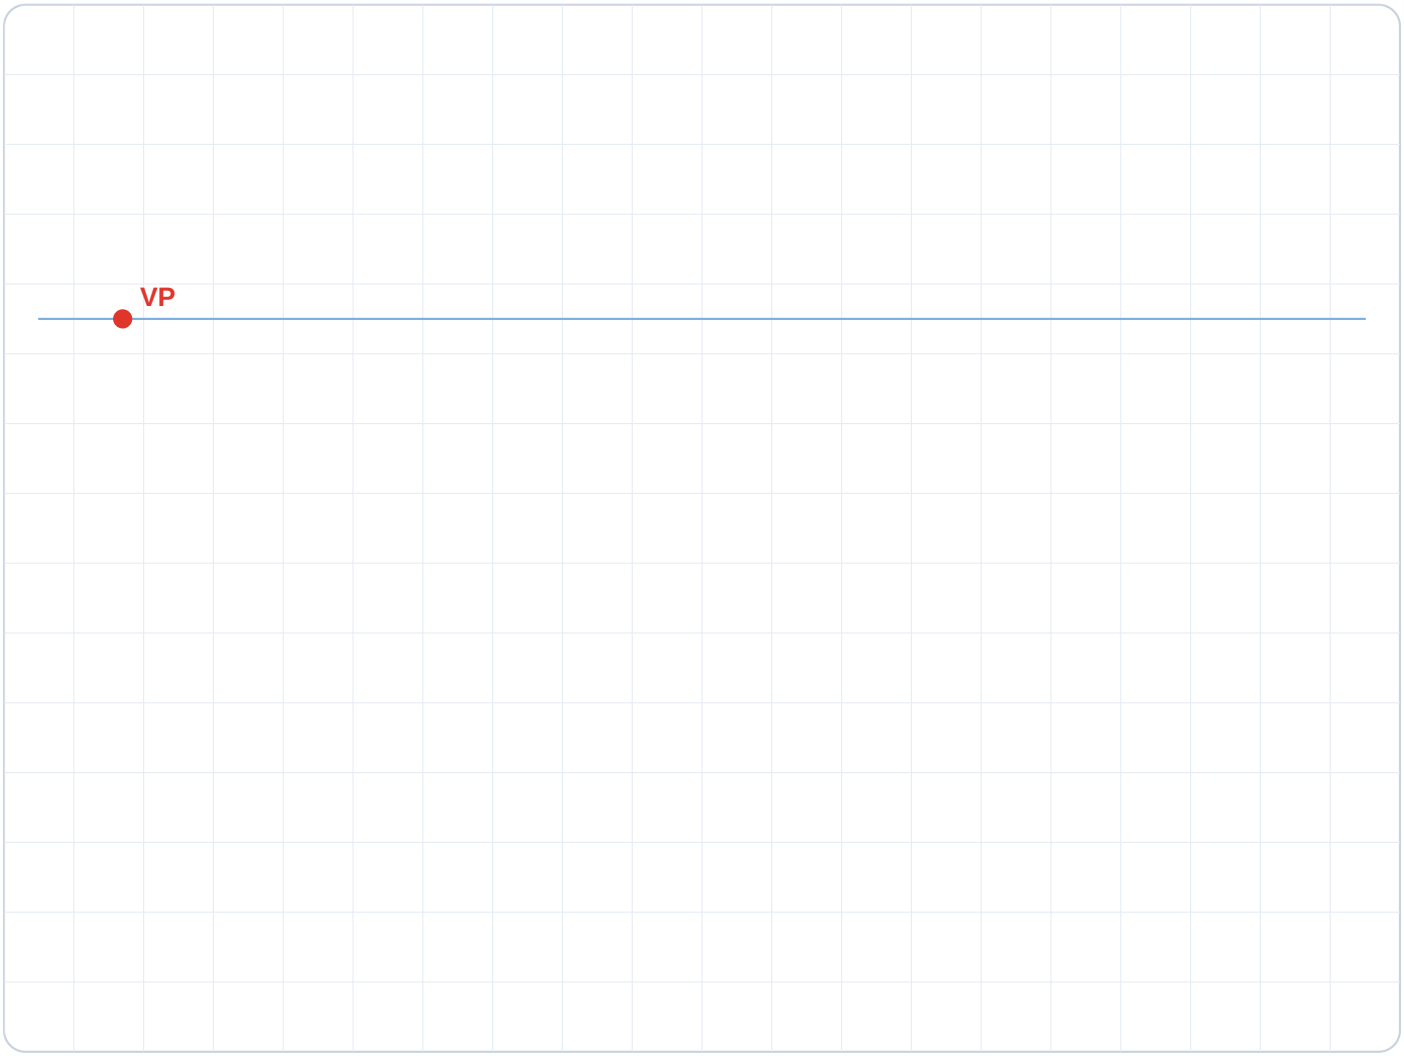
Stairs in one-point



How to use this page

1. Trace the blue dotted guide lines very lightly.
2. Go over the grey dashed lines firmly. Use a ruler.
3. Shade the dark side last. Then try it on the next page without help.

Stairs in one-point



Now draw it on your own

The horizon and vanishing point are already here. Build the drawing from step 2.

Name _____ Date _____

How did it go? ○ Easy ○ OK ○ Hard
