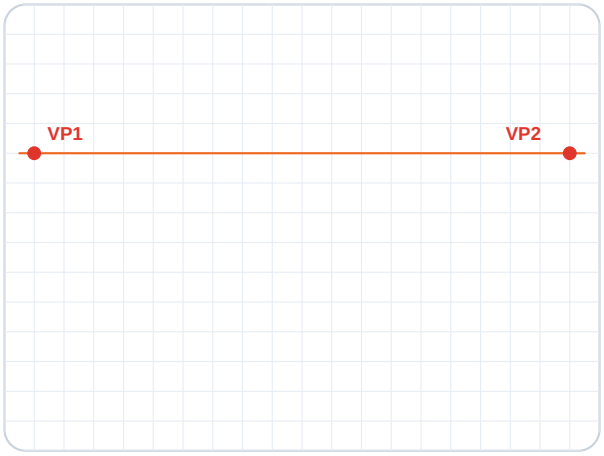
Box in two-point

Follow the steps. Orange = the line you draw in that step. Blue = light guide lines.

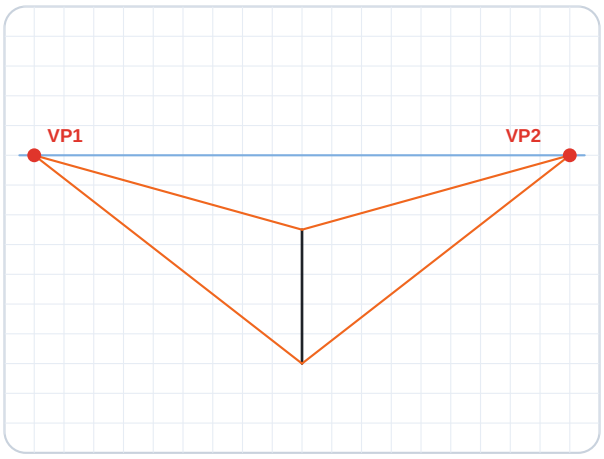


STEP 1 **Two vanishing points**

Draw the horizon and put a vanishing point near each end of it.

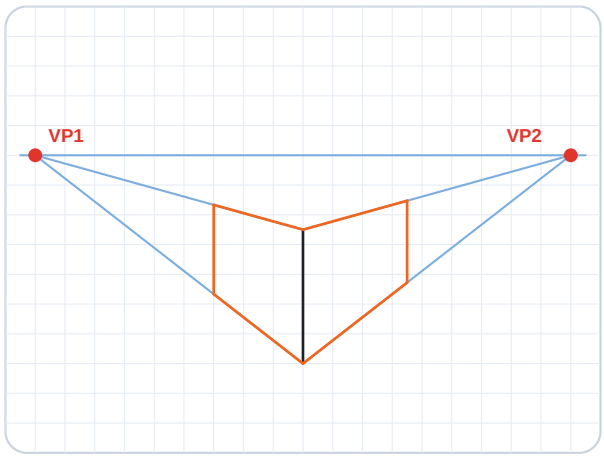
STEP 2 **The nearest corner**

Draw one vertical line below the horizon. This is the corner of the box closest to you.



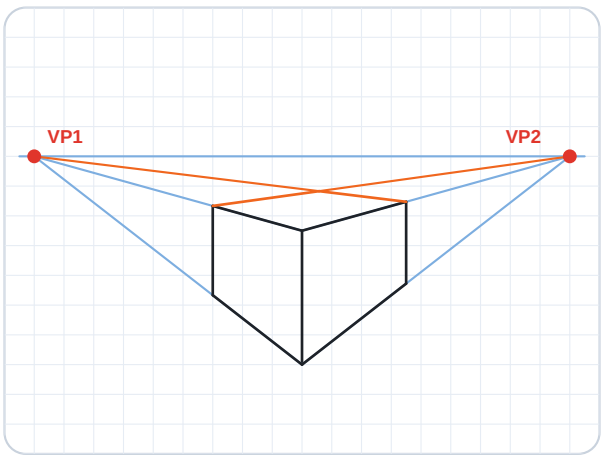
STEP 3 **Connect to both VPs**

From the top and the bottom of that line, draw light lines to both vanishing points.



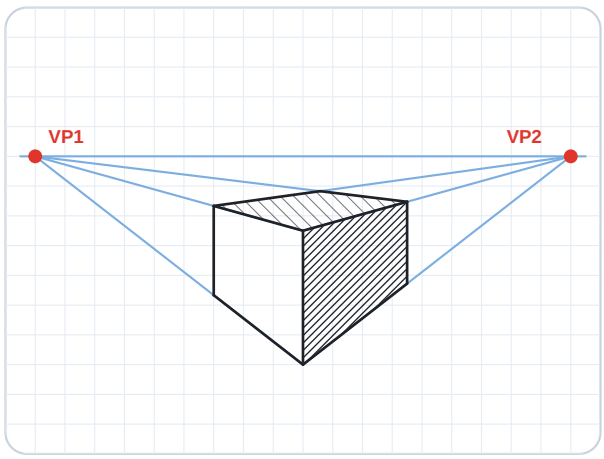
STEP 4 **Set the width**

Pick how wide each side is and draw two more verticals. Ink the edges between them.



STEP 5 **Close the top**

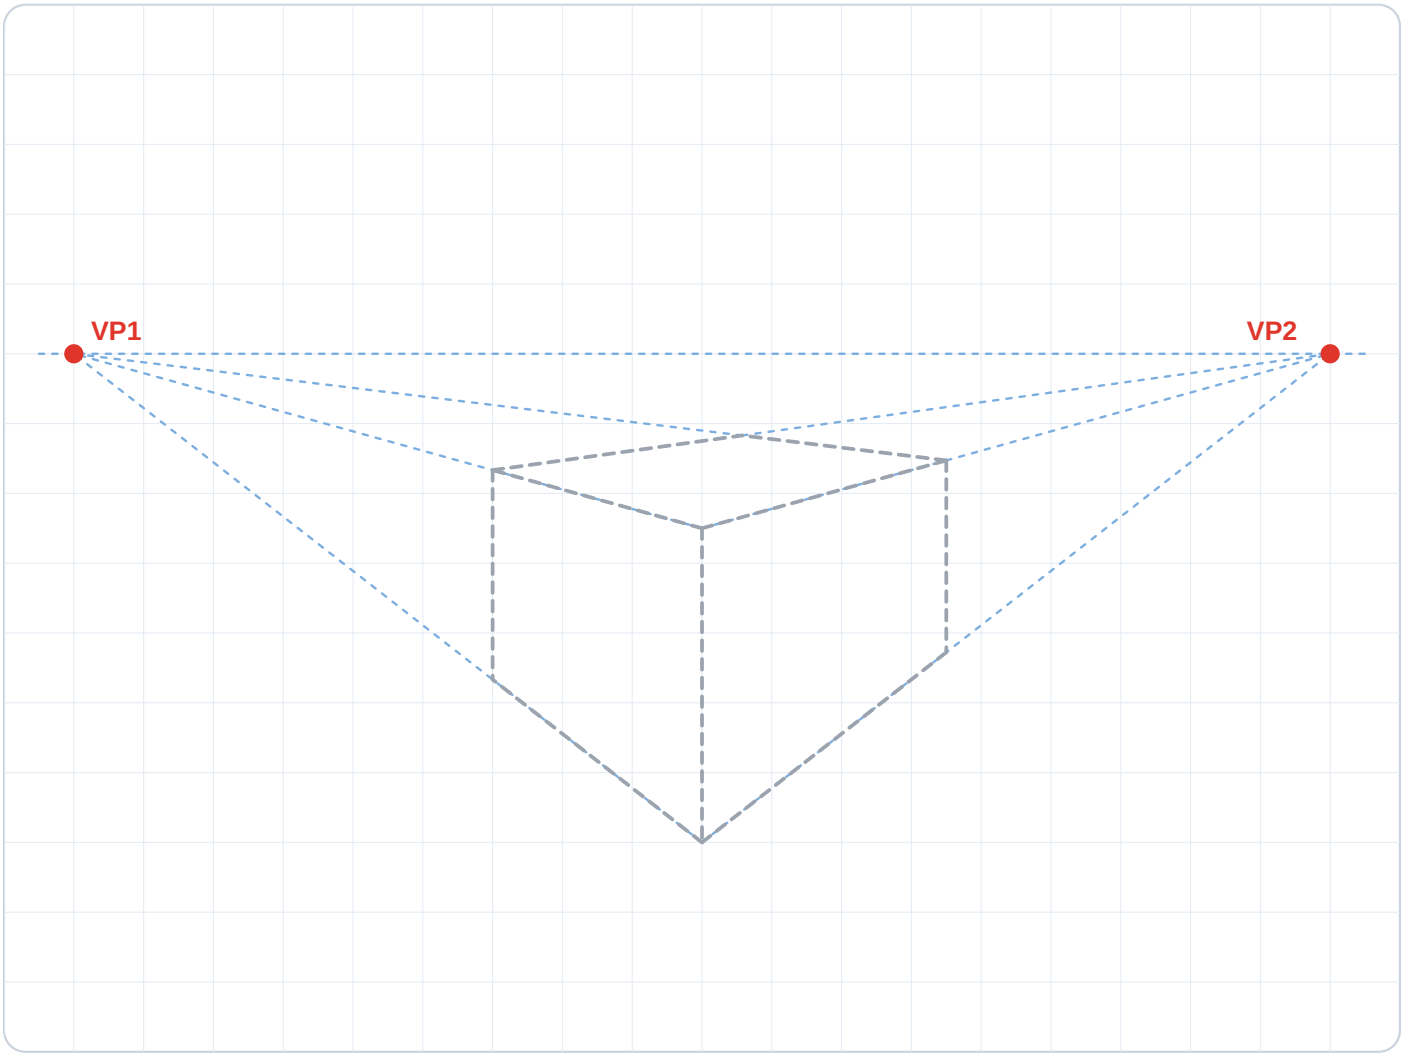
From the top of each new edge, draw a line to the opposite VP. Where they cross is the back corner of the top.



STEP 6 **Shade it**

Shade the right side and give the top a light tone. That is a box in two-point perspective.

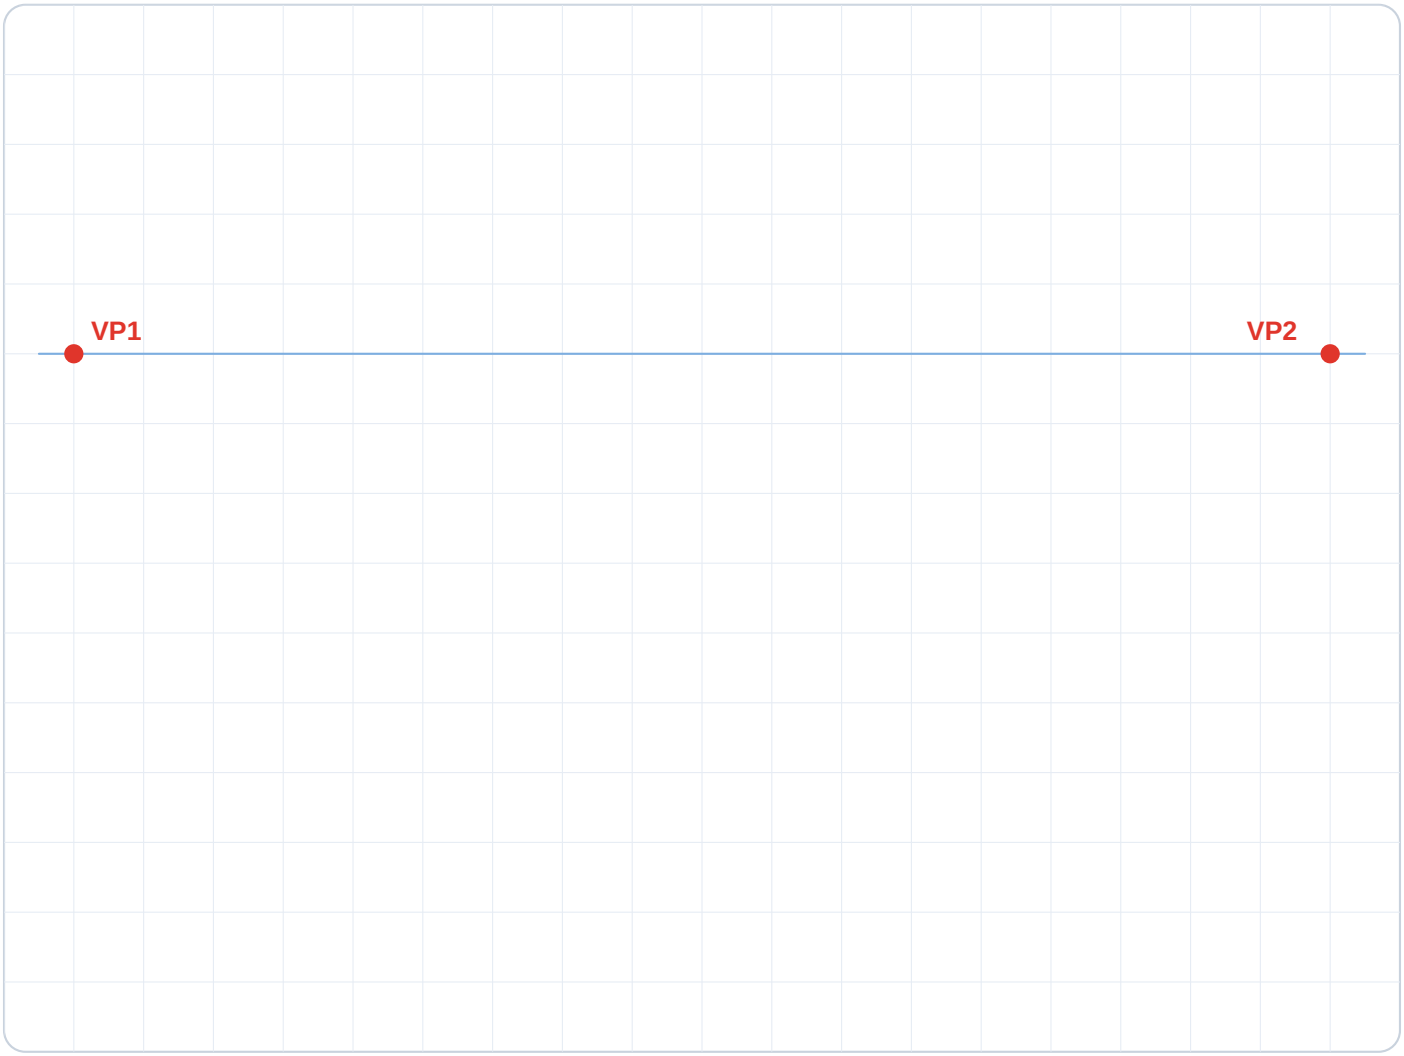
Box in two-point



How to use this page

1. Trace the blue dotted guide lines very lightly.
2. Go over the grey dashed lines firmly. Use a ruler.
3. Shade the dark side last. Then try it on the next page without help.

Box in two-point



Now draw it on your own

The horizon and vanishing point are already here. Build the drawing from step 2.
