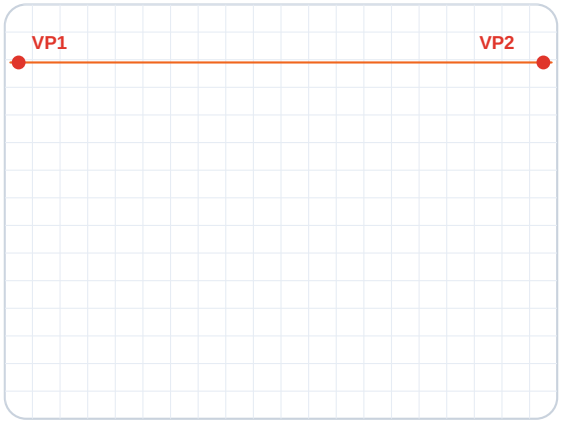
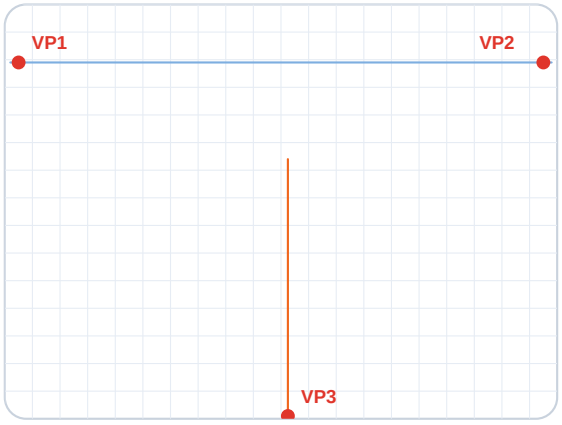
Building from above

Follow the steps. Orange = the line you draw in that step. Blue = light guide lines.



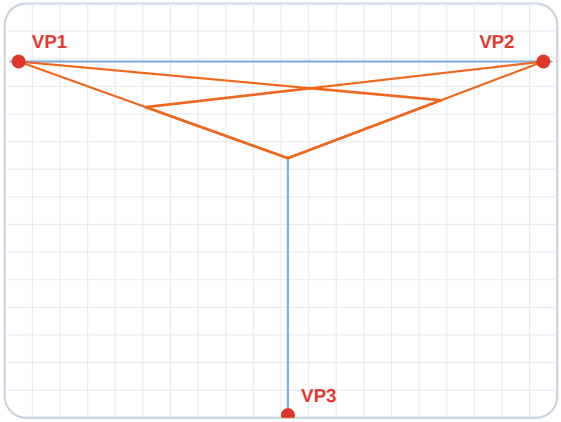
STEP 1 **A high horizon**

Draw the horizon near the top of the page with VP1 and VP2. We are high up, looking down.



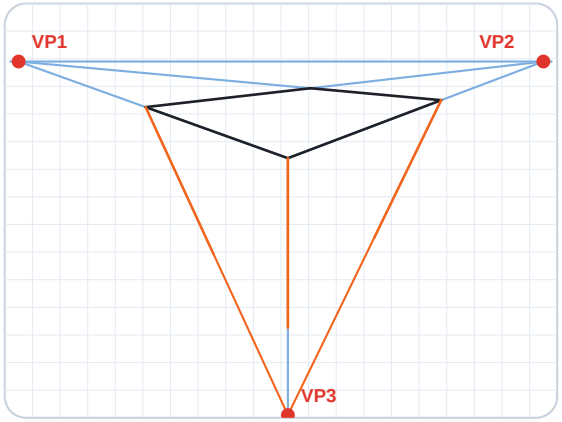
STEP 2 **VP3 below**

Put VP3 low, below the middle of the page. Every vertical edge now leans down toward it.



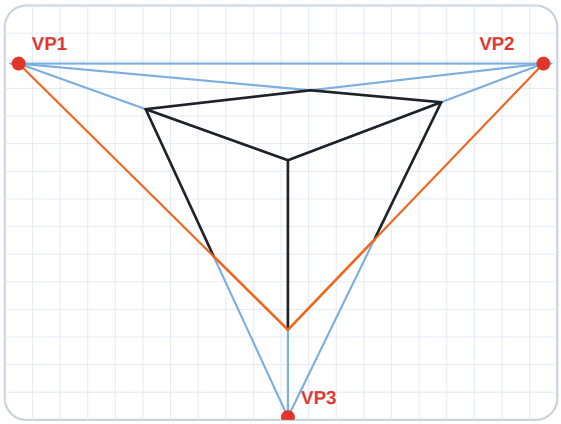
STEP 3 **The roof**

From the nearest roof corner, draw edges toward VP1 and VP2. Cross lines to the opposite VPs to find the back corner.



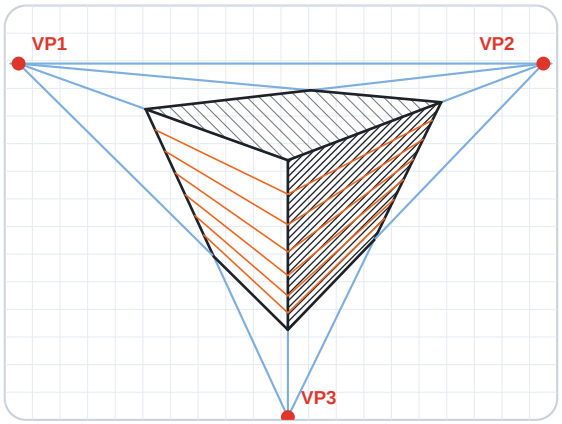
STEP 4 **Walls down to VP3**

Draw the three vertical edges down toward VP3. Choose how tall the building is on the front edge.



STEP 5 **The base**

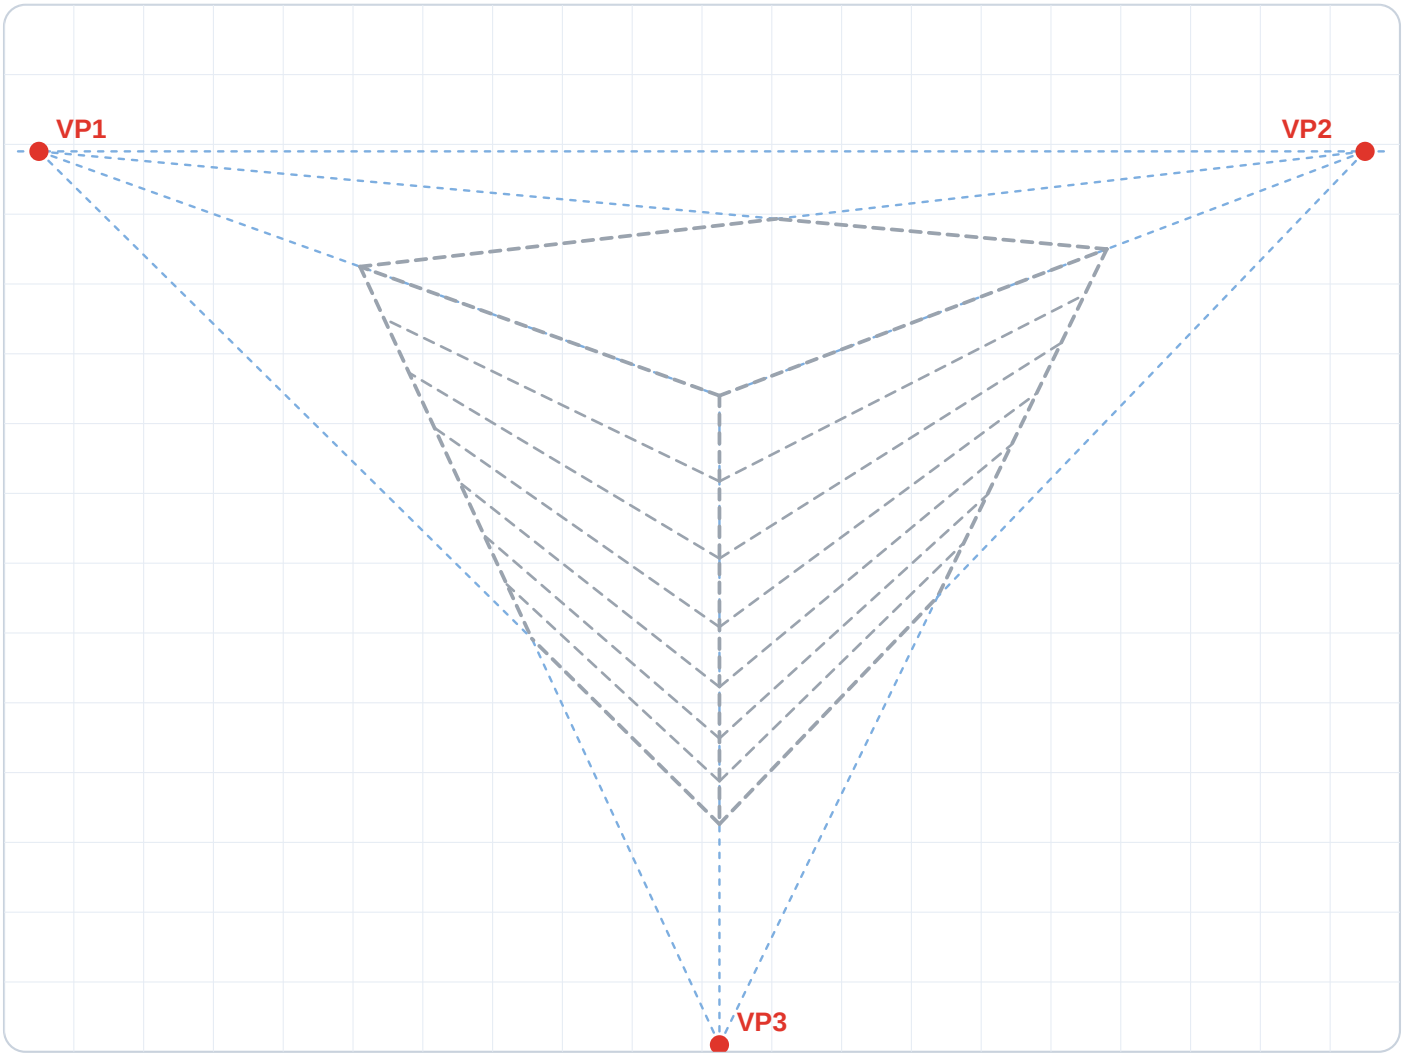
From the bottom of the front edge, draw lines toward VP1 and VP2. They end at the side edges.



STEP 6 **Floors and shade**

Draw floor lines toward VP1 and VP2. They get closer as they go down. Shade one side and tone the roof.

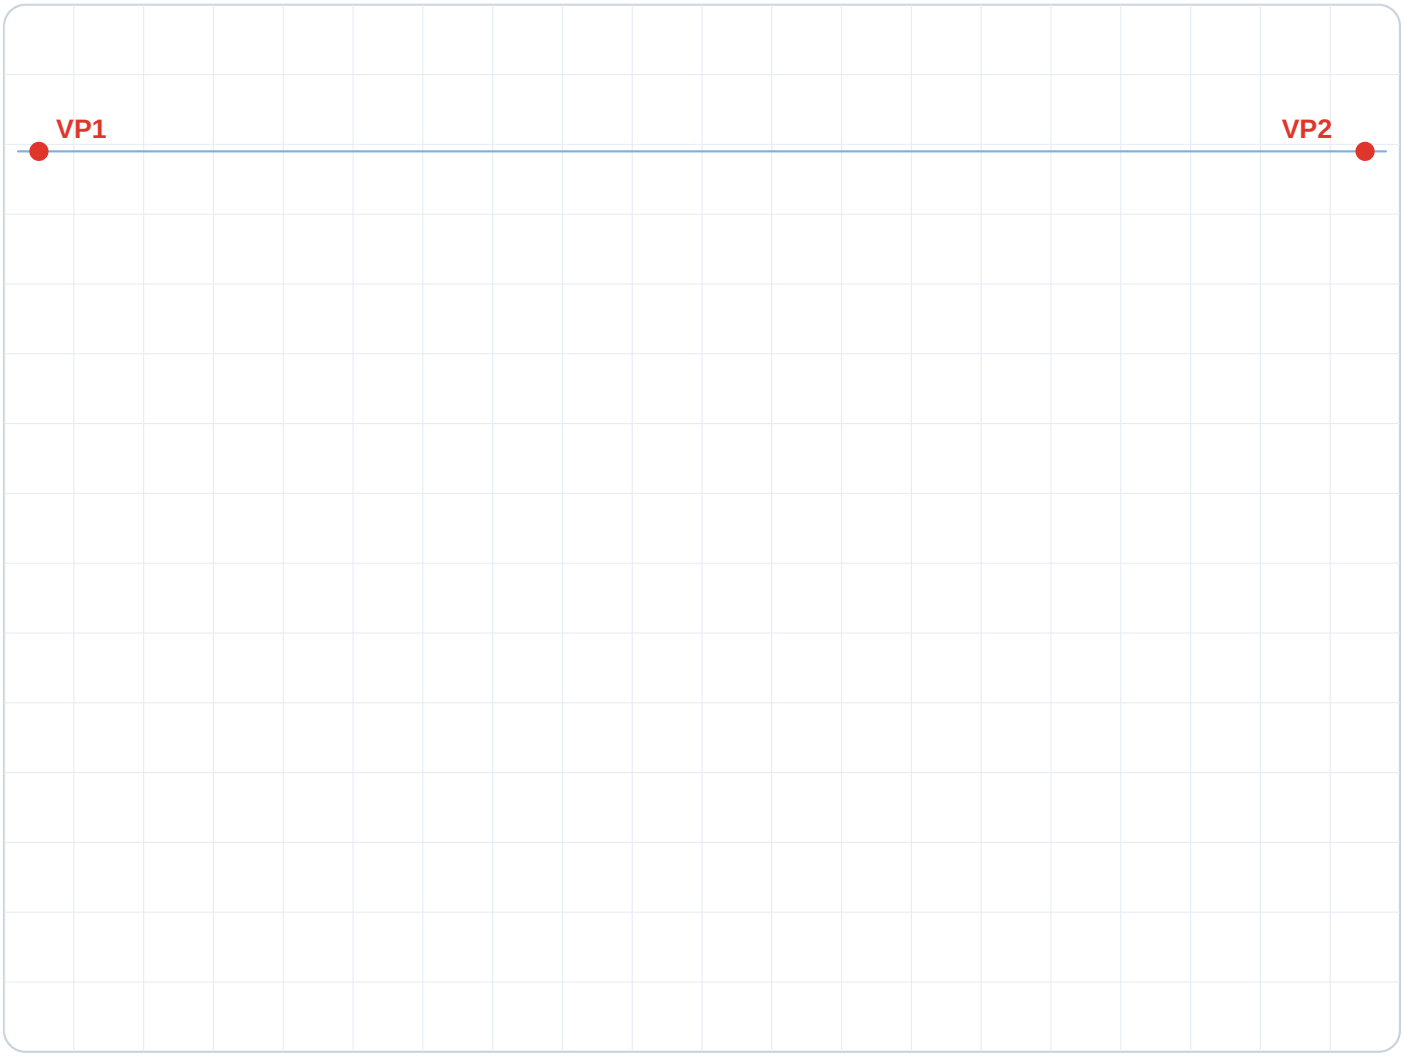
Building from above



How to use this page

1. Trace the blue dotted guide lines very lightly.
2. Go over the grey dashed lines firmly. Use a ruler.
3. Shade the dark side last. Then try it on the next page without help.

Building from above



Now draw it on your own

The horizon and vanishing point are already here. Build the drawing from step 2.
