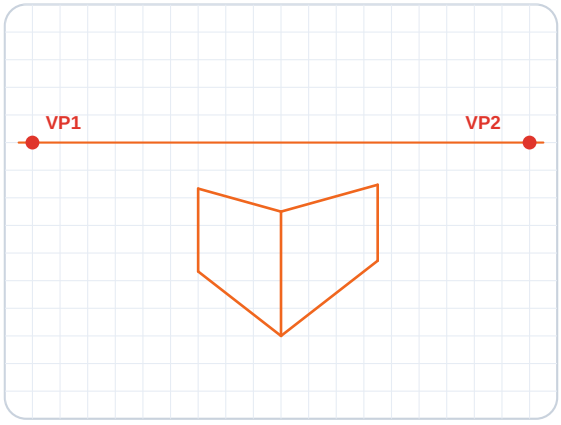
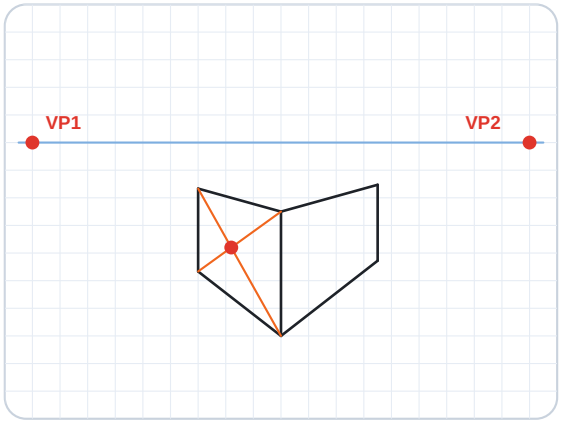
# A simple house

Follow the steps. Orange = the line you draw in that step. Blue = light guide lines.



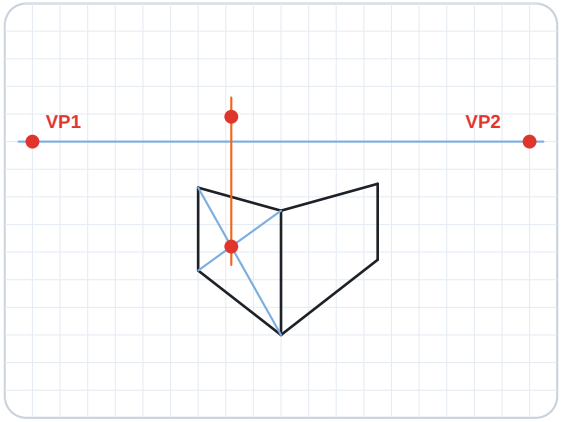
**STEP 1** **Start with a box**

Draw a two-point box, like the last lesson, but leave out the top face.



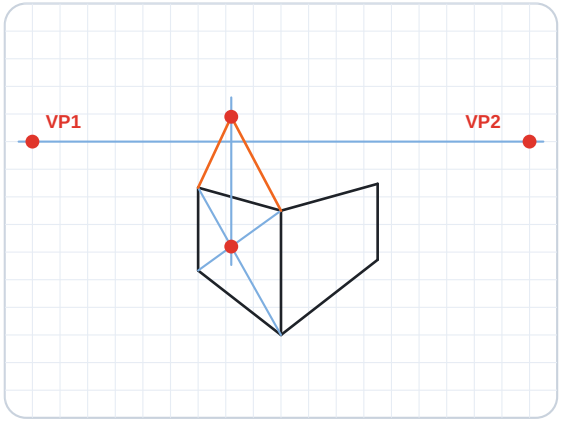
**STEP 2** **Find the centre**

Draw an X from corner to corner on the left face. Where the lines cross is the centre in perspective.



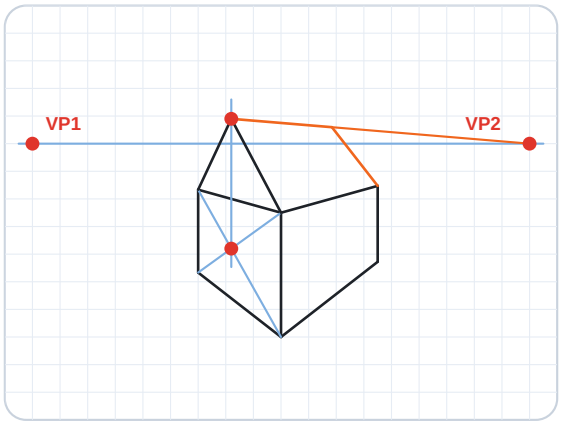
**STEP 3** **Raise the peak**

Draw a vertical line up through the centre and mark the top of the roof on it.



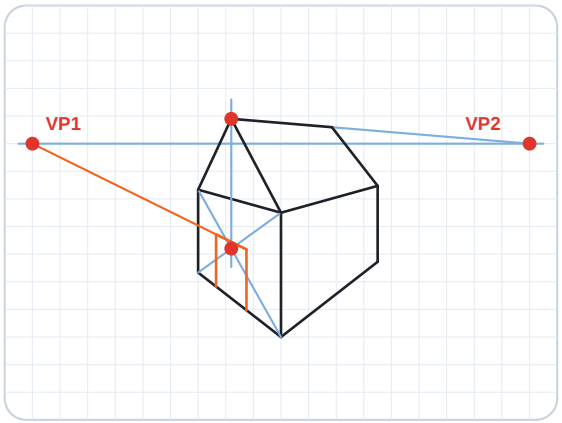
**STEP 4** **Draw the gable**

Connect the peak to the two top corners of the left face. That triangle is the end of the roof.



**STEP 5** **Run the ridge**

Draw the ridge from the peak toward VP2. Bring the back roof edge down to the far corner of the box.

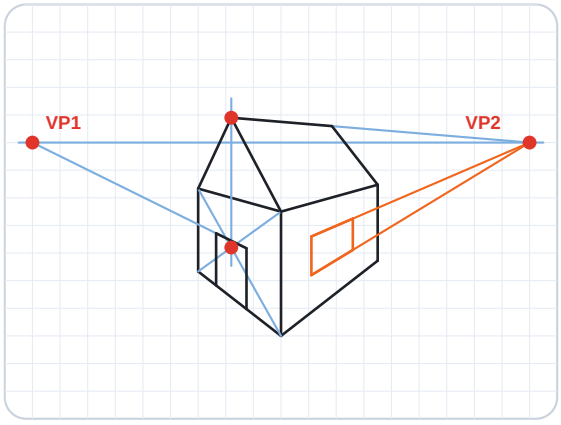


**STEP 6** **The door**

Draw the right side of the door. From VP1, draw a light line to its top. Draw the left side up to that line, then the top of the door.

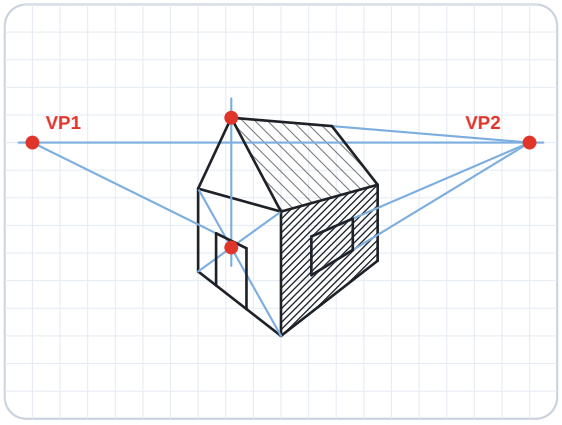
# A simple house

Follow the steps. Orange = the line you draw in that step. Blue = light guide lines.



**STEP 7** **The window**

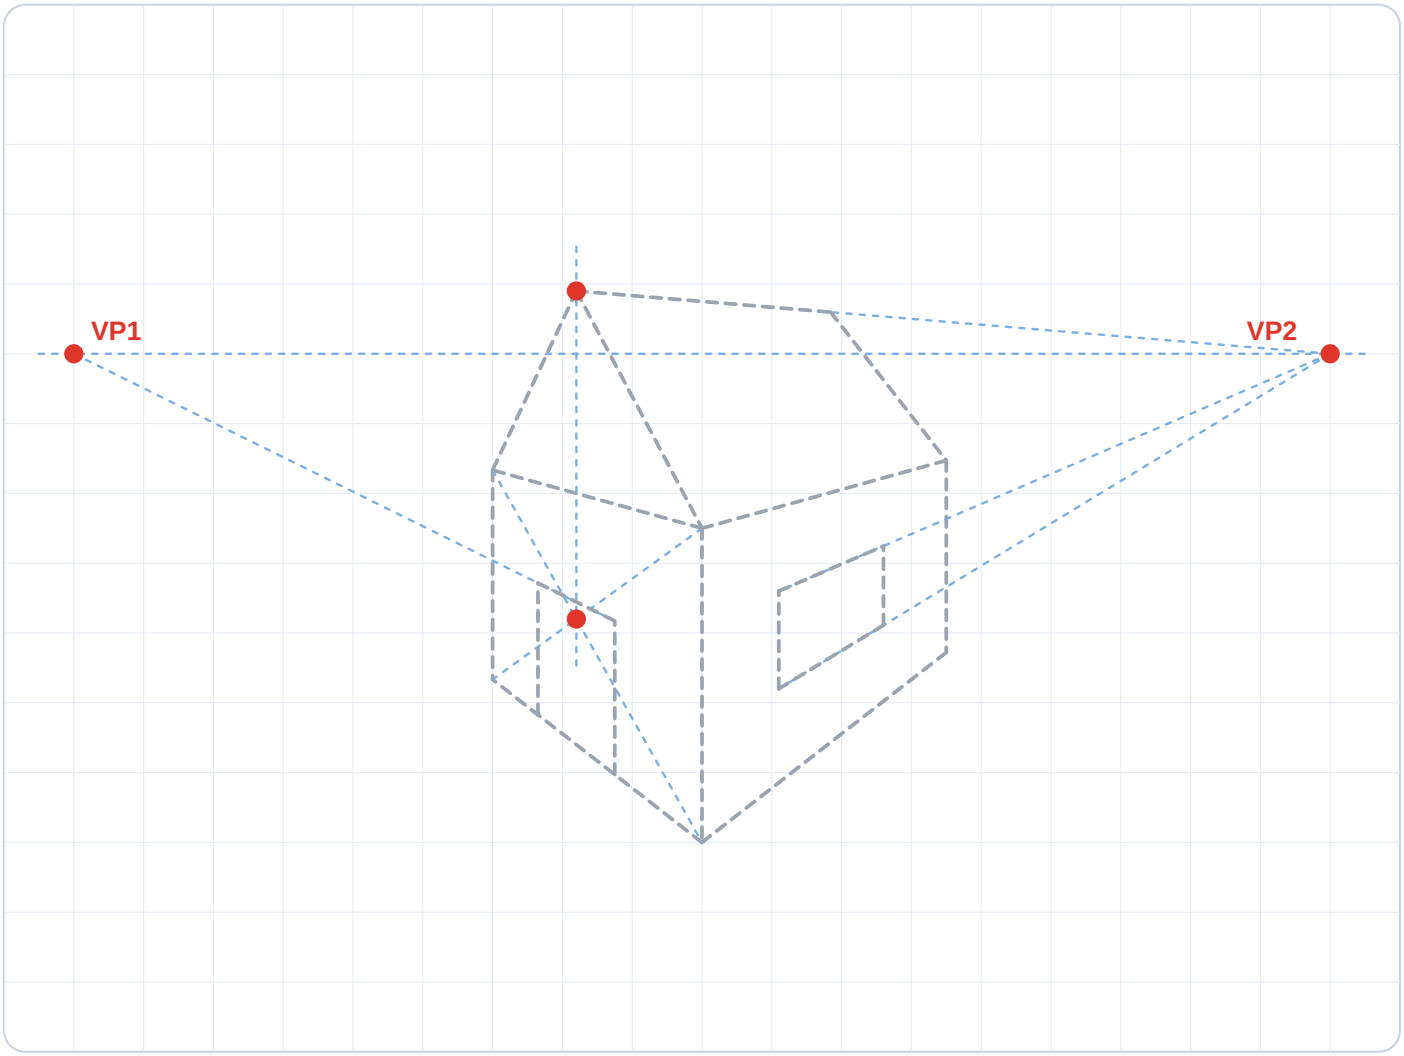
Draw the left side of the window. From VP2, draw light lines to its top and its bottom. Draw the right side between them, then the top and the bottom.



**STEP 8** **Shade and finish**

Tone the roof lightly and shade the long wall. Your house is finished.

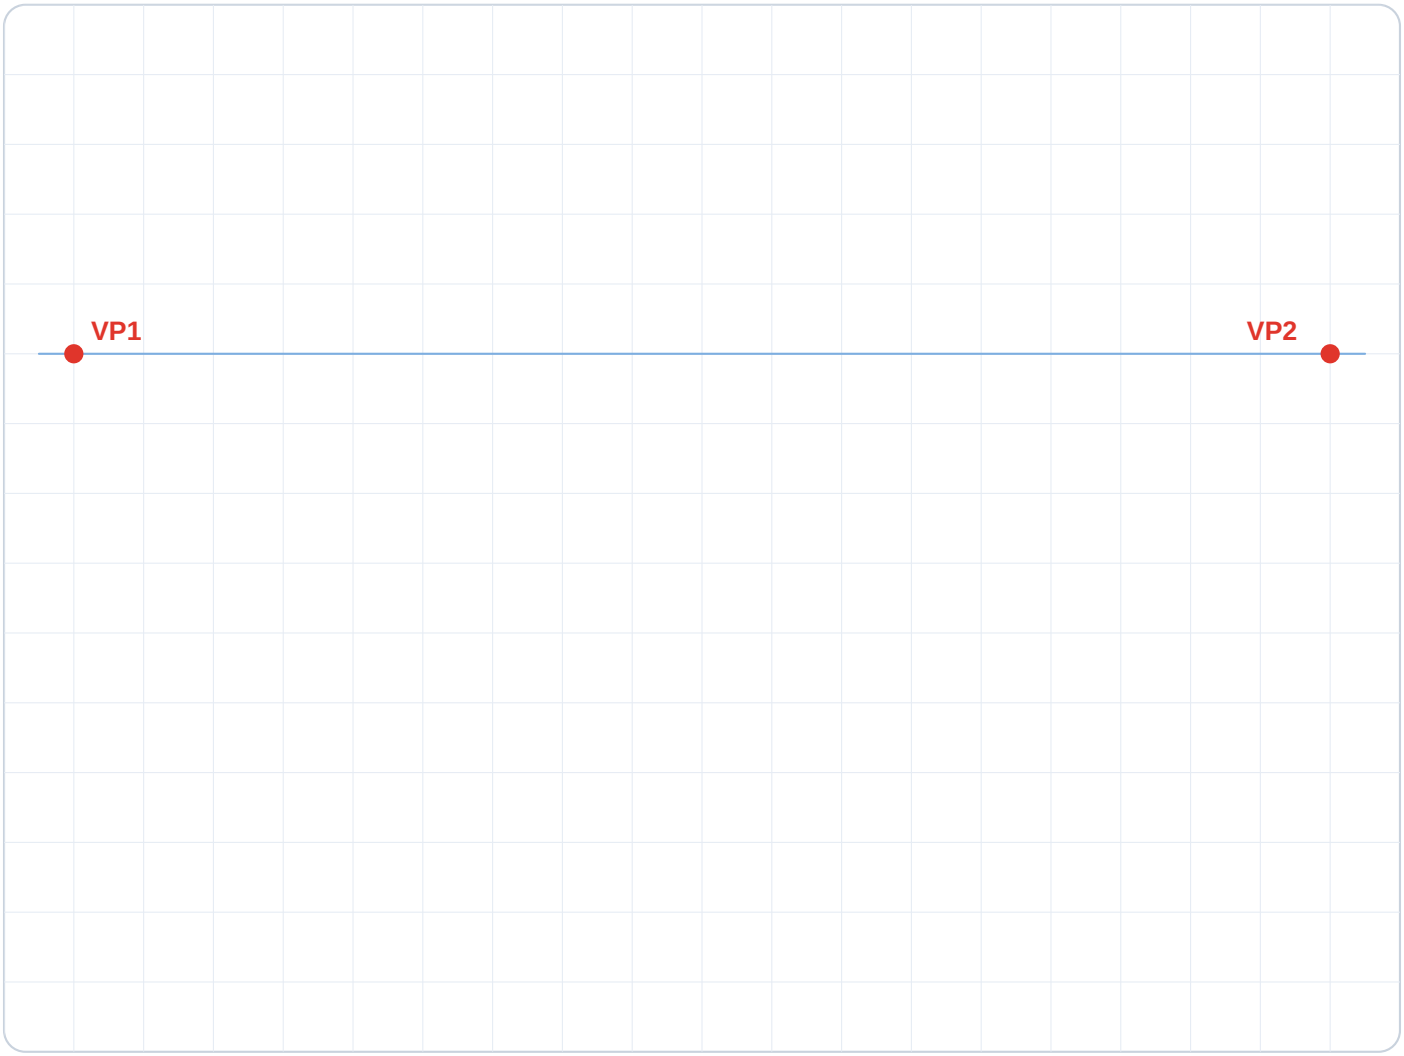
# A simple house



## How to use this page

1. Trace the blue dotted guide lines very lightly.
2. Go over the grey dashed lines firmly. Use a ruler.
3. Shade the dark side last. Then try it on the next page without help.

# A simple house



## Now draw it on your own

The horizon and vanishing point are already here. Build the drawing from step 2.
