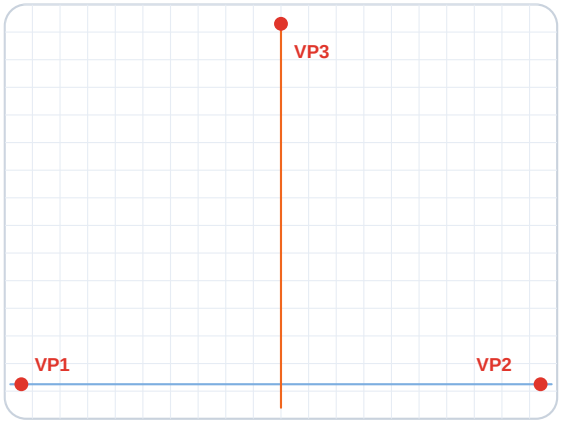
Tower looking up

Follow the steps. Orange = the line you draw in that step. Blue = light guide lines.

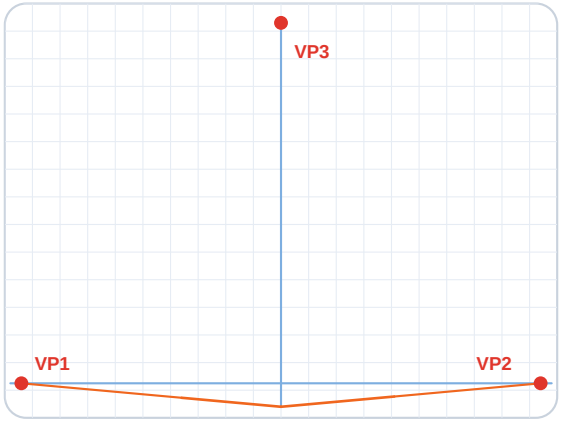
STEP 1 **A low horizon**

Three-point perspective adds a third VP. Draw a low horizon with VP1 and VP2. We are looking up at a tall building.



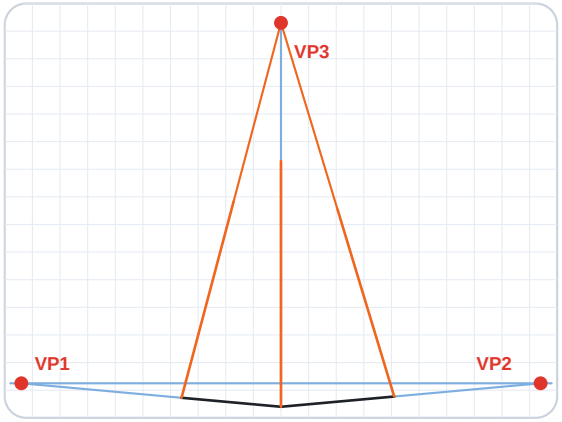
STEP 2 **The third VP**

Put VP3 high above the middle. Every vertical edge of the building leans toward it.



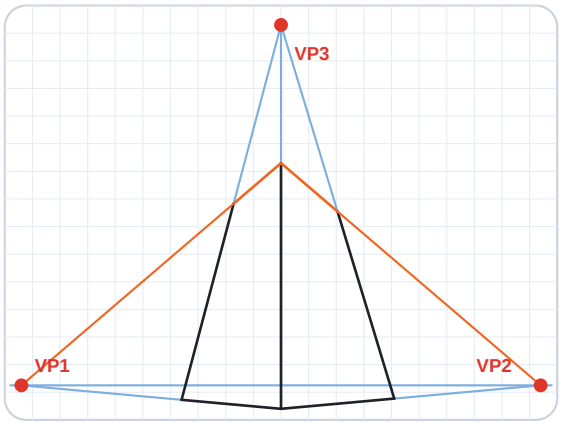
STEP 3 **The base**

From the nearest bottom corner, draw the base edges toward VP1 and VP2.



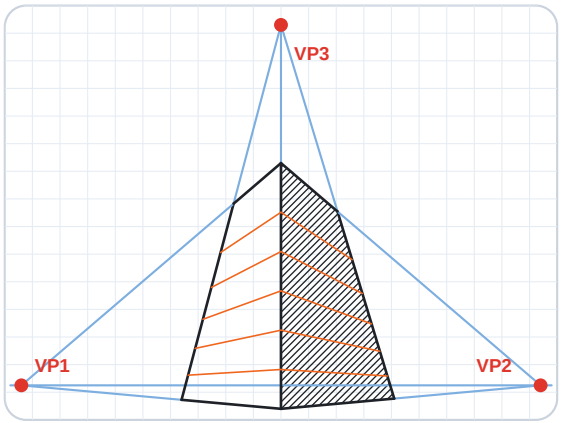
STEP 4 **Lean the walls**

Draw the three vertical edges up toward VP3. Choose the height on the front edge.



STEP 5 **The top edges**

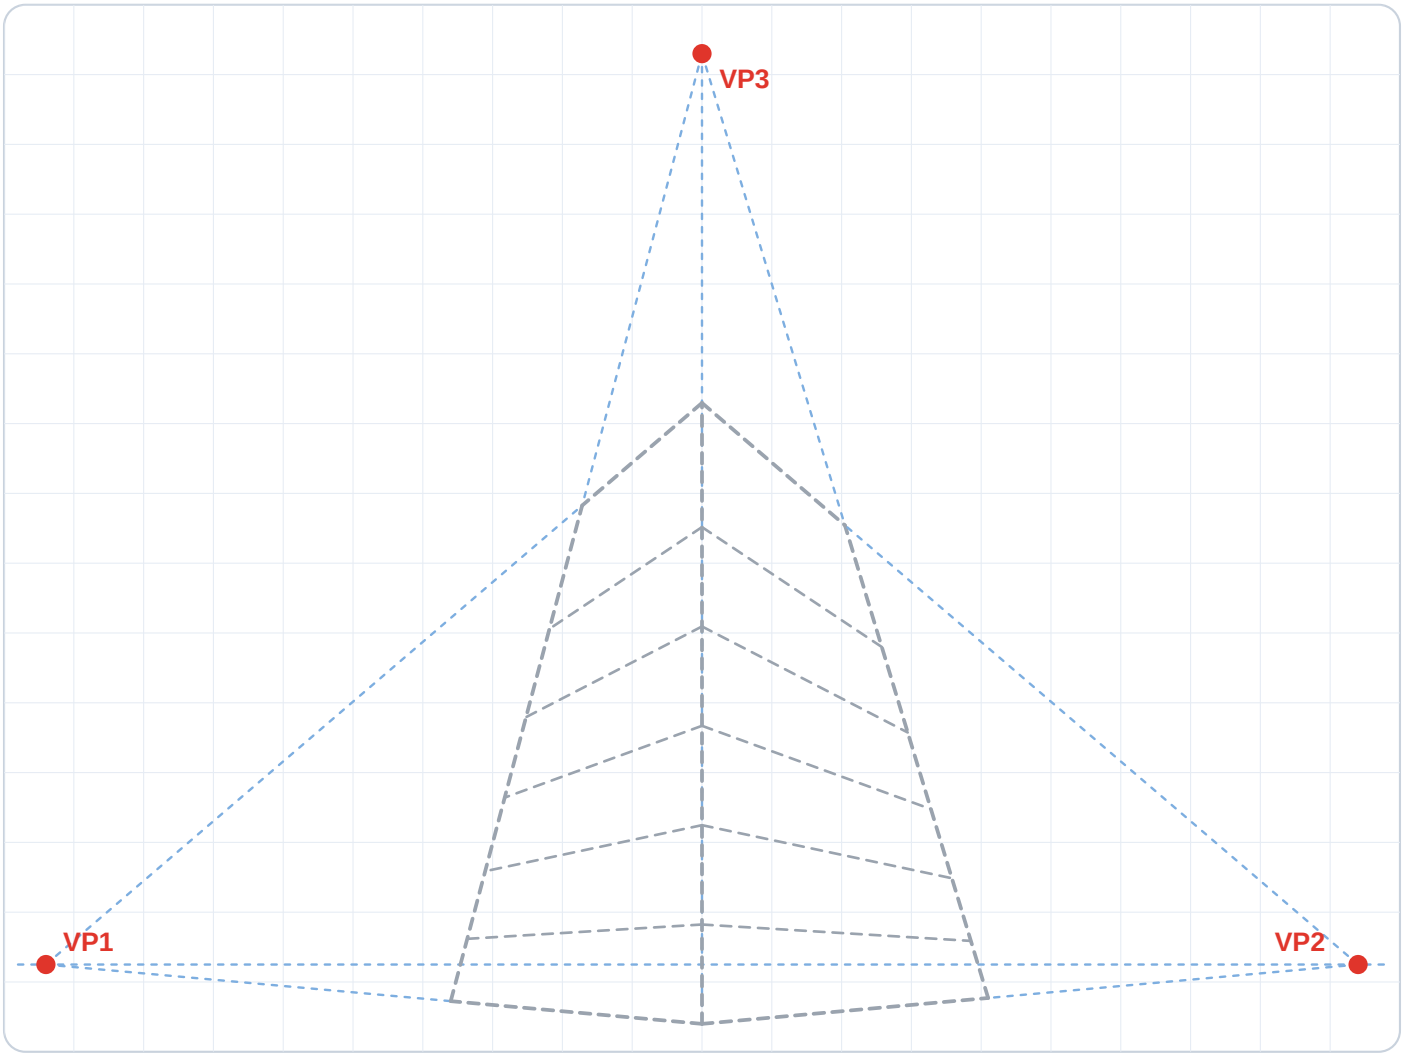
From the top of the front edge, draw lines to VP1 and VP2. They end at the side edges.



STEP 6 **Floors and shade**

Mark floors on the front edge and send each one to its VP. Shade one side and your tower is done.

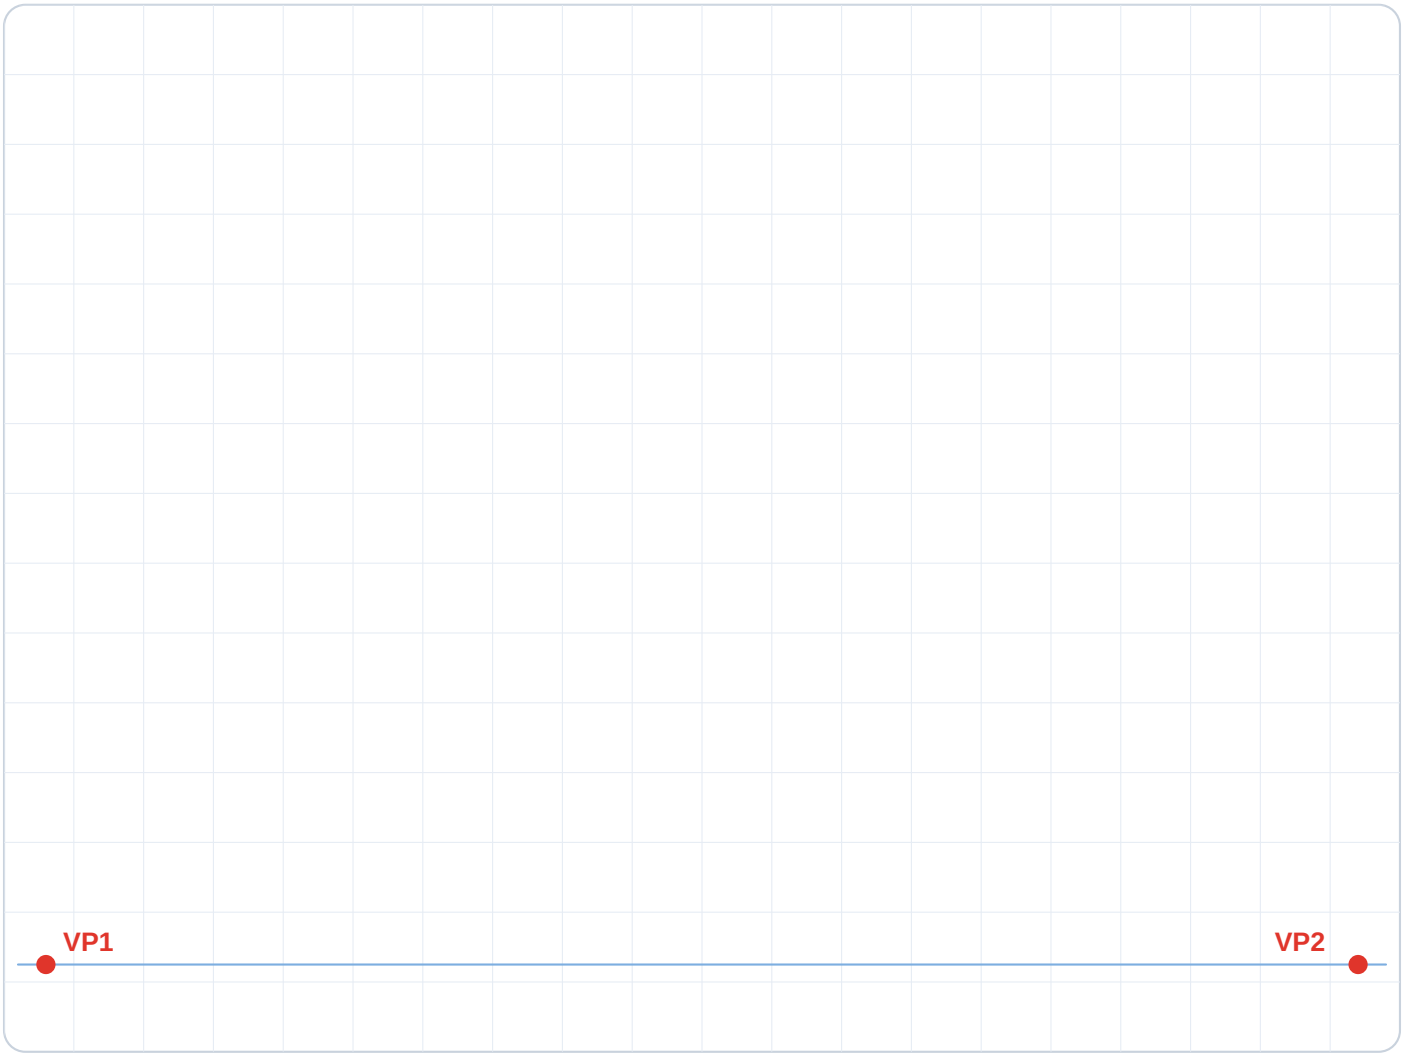
Tower looking up



How to use this page

1. Trace the blue dotted guide lines very lightly.
2. Go over the grey dashed lines firmly. Use a ruler.
3. Shade the dark side last. Then try it on the next page without help.

Tower looking up



Now draw it on your own

The horizon and vanishing point are already here. Build the drawing from step 2.
